

How to tie Thai fisherman's pants

1. Hold the upper edge of the pants in front of you so that it's taut all around.

2. Bring one hand towards you so that that side of the pants is tight against your stomach.

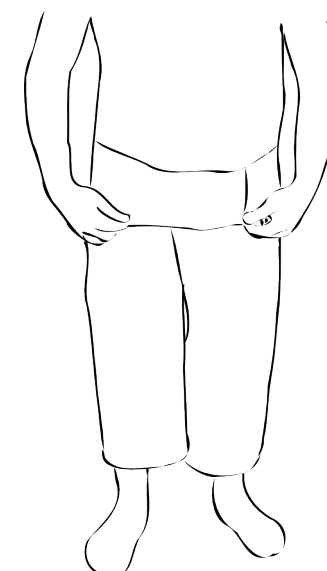

3. Do the same with your other hand right below the first.

4. Grab one end of the string from the backside of the pants with the first hand while holding the pants up with the other.

5. Grab the other end of the string with the other hand while you hold the first end of the string (and the pants in place) with the first hand and then tie a bow a bit below the edge of the pants.

6. Fold down the edge over the string.
